## ABOUT ME

---

For almost 1 and a half years, I have accumulated practical experience in HTML, CSS, Javascript, PHP, SQL, Laravel, Bootstrap 5 and Wordpress, building and developing web applications from scratch or improving existing applications. My experience in C++ is due to the 4 years I spent in high school, where I learned and applied a number of algorithms like backtracking, divide et impera, directed and undirected graphs, lists, nodes, stacks and more. This experience helped me develop my logical and algorithmic thinking skills, which are an asset fundamental in the field of IT.

During my college studies, I acquired a wide range of technical knowledge, tackling programming languages such as C#, Java, Visual Basic, in addition to the technologies mentioned above, as well as economic knowledge. This experience gave me a broader perspective on programming and improved my ability to understand and solve technical and business problems in an effective way.

Currently, I am in the process of preparing for admission to the Master of Artificial Intelligence within the Faculty of Automation and Computers from the Bucharest Polytechnic. This choice is motivated by my passion for this technology and the desire to acquire advanced knowledge in this field.

I want to use my knowledge and skills in technology and programming to contribute to innovation and project development. I am ready to collaborate with my team and learn as many things as possible, to develop myself in as many plans as possible related to software development, to be able to bring creative and effective solutions to technical issues and the realization of software projects.

## WORK EXPERIENCE

---

### Software engineer - Web developer

*Infynit Digital* [ 01/02/2022 – Current ]

**Address:** Boulevard Timisoara No. 26 Plaza Romania Offices, Bucharest (Romania)

**City:** Bucharest

**Country:** Romania

**Website:** <https://infynit.eu>

For almost 1 and a half years, I have been working passionately at Infynit Digital as a software engineer focused on web development. I have had the opportunity to create and develop numerous websites and web applications using a variety of technologies such as HTML, CSS, PHP, JavaScript, Laravel, Bootstrap 5 and Wordpress. I contributed to the development of some projects more advanced, by using innovative approaches and solving complex technical problems. In that position, I gained solid skills in web development, especially in the mentioned technologies, which helped me become an efficient and creative web developer.

#### Main tasks:

On smaller projects like presentation sites or online stores, I'm perfectly capable of creating in total and to maintain these projects by myself, these being some of the main attributions, among many others:

1. Creation and modification of static and dynamic web pages, along with various functionalities, such as forms of contact, map with exact reference to the client's headquarters, etc.
2. Creation and design configuration of the Store page, along with the functionality required by the client, variations of products, etc.
3. Implementation of online payment - Netopia, Stripe.

4. Courier implementation - Fancourier.
5. Create and configure header and footer.
6. Configuration of emails received by the customer when placing an order through the online store, and automatically sent by the client to buyers following orders (email of thanks, data about order, invoice, etc.).
7. Adding logo, favicon.
8. Main page creation - along with various functionalities such as slider, products grid, etc.
9. Testing and solving found problems, debugging.

Within web applications, more advanced projects, among others, these are some of the functionalities to which I worked, using the MVC pattern:

1. Creation and modification of the functionalities of listing, creating, editing and deleting the various information found in database and associated with other information in the database.
2. Recording feedback for providers associated with a service, based on an algorithm involving 5 stars and displaying their rating according to the algorithm.
3. Added Waze button with dynamic retrieval from location database according to latitude and longitude.
4. Manual testing and solving the problems found - debugging.
5. Modify and/or design existing/new pages.
6. A user's ability to upload their profile picture and its display.
7. Upload .pdf, .docx files.
8. Numbering and display of various counters, for the statistics of each account (e.g. number of sales).
9. Creation of various filters according to clear specifications provided by the client.
10. Creation of various sorts according to clear specifications provided by the client.
11. Validation of various fields for creation and editing functions.

I can say with confidence that my work has always been appreciated by clients and the company administrator, and communication with them and colleagues was excellent.

## **PROJECTS**

---

### **Virtual Museum of Turks and Tartars in Dobrogea (Romania)**

Link: <http://miras.gov.ro/1/>

### **Bicycle online store**

Link: <https://hotbikes.ro/>

### **One-product online store**

Link: <https://nastylobster.com/>

### **Online service store**

Online store created with European funds, respecting the specific rules for creation and operation.

## EDUCATION AND TRAINING

---

### Romanian-American University graduated with a degree in Economic Sciences

*Faculty of Management Computer Science, Specialization Economic Computer Science* [ 01/10/2019 – 15/07/2022 ]

Address: Boulevard Expoziției Nr.1, Bucuresti (Romania)

Website: <https://www.rau.ro/?lang=en>

### Graduate of the "Elena Cuza" National College

*Mathematics-computer science profile, computer science intensive* [ 01/09/2015 – 12/07/2019 ]

**Developing the design and structure of software products required to implement software systems, software applications, databases, WEB pages. Customizing, configuring and modifying software applications.**

*"Elena Cuza" National College - Certificate of professional competence* [ 12/07/2019 ]

### Database Design and Programming with SQL

*Oracle Academy* [ 06/06/2019 ]

### Introduction to Java Programming

*Romanian-American University* [ 22/11/2019 ]

## LANGUAGE SKILLS

---

Mother tongue(s): **Romanian**

### Other language(s):

#### English

LISTENING B2 READING B2 WRITING B2

SPOKEN PRODUCTION B2 SPOKEN INTERACTION B2

#### French

LISTENING A1 READING A2 WRITING A1

SPOKEN PRODUCTION A1 SPOKEN INTERACTION A1

## HOBBIES AND INTERESTS

---

### Artificial intelligence

It is a fascinating subject that represents a combination of mathematics, programming and psychology, offering amazing opportunities to improve people's lives through technology. It is an extreme complex field, but its results can be of great benefit to people if it is used carefully and always under control.

### Dance and fitness

Dance and fitness are two of my biggest passions. I love to move and put my body to work, and through dance and fitness, I manage to express myself and keep myself in optimal physical shape.

### Music

I love listening to music as I find it a great way to relax and unwind. In the free time, I like to explore different genres of music and discover new artists and songs to give me inspiration and positive energy.
